```
1 // http://expressjs.com/api.html#res.download
2 var express = require('express')
3   , app = module.exports = express();
4
5 app.get('/', function(req, res){
6   res.send('<ul>'
```

```
7     + '<li>Download <a href="/amazing.txt">amazing.txt</a>.</li>'
8     + '<li>Download <a href="/missing.txt">missing.txt</a>.</li>'
9     + '</ul>');
10  });
11
12  // /files/* is accessed via req.params[0]
13  // but here we name it :file
14  app.get('/:file(*)', function(req, res, next){
15    var file = req.params.file
16    , path = __dirname + '/files/' + file;
17
18    res.download(path);
19  });
20
21  // error handling middleware. Because it's
22  // below our routes, you will be able to
23  // "intercept" errors, otherwise Connect
24  // will respond with 500 "Internal Server Error".
25  app.use(function(err, req, res, next){
26    // special-case 404s,
27    // remember you could
28    // render a 404 template here
29    if (404 == err.status) {
30      res.statusCode = 404;
31      res.send('Cant find that file, sorry!');
32    } else {
33      next(err);
34    }
35  });
36
37  if (!module.parent) {
38    app.listen(80);
39    console.log('Express started on port %d', 80);
```

You should create a README.md.
